

Utility Pipe Laser

TP-L6

The Industry Standard for Pipe and Beam Alignment

Utility Pipe Laser

TP-L6

The TP-L6 pipe laser's smaller size, long-life battery, and convenient mobile app make the new unit one of the most flexible on the market. Field crew members are able to spend less time physically entering manholes to make adjustments, thereby increasing safety. The mobile app puts the user in control remotely to visually assist with configuring settings and making adjustments.

One fully charged battery can last for the whole week. Plus the same multi-use battery can power a variety of other Topcon equipment on active job sites.

The TP-L6 is ideal for contractors that lay pipe required to be at specific slopes as well as projects involving trenching, sewers, mining, and tunneling.

60-hour battery life

Compact design adds flexibility to setup in a tighter inverts

Mobile app remote display makes seeing and adjusting settings easier

Less time climbing down into manholes and trenches

Multi-use battery powers a variety of other Topcon job site equipment

- 1 Removable handle
 - 2 Laser plummet (TP-L6 AV and GV)
- 3 Rugged cast aluminum, waterproof housing
 - 4 Large illuminated LCD
- 5 Line control and automatic center
 - 6 Locking battery pack

Auto-alignment (TP-L6GV/AV/G)

Accelerate production by making setup and alignment automatic. Patented scanning technology allows the industry's only fast, accurate one-person automatic alignment feature.

When combined with features like auto-alignment, the world's most accurate grade mechanism, power options that include a 20% battery increase over existing lasers; it's no wonder Topcon has set the industry standard.

Remote Management for Precision Measurement

Control at your fingertips

The Topcon “Laser Manager” mobile app puts many of the most common pipe laser functions directly in your hand, such as:

- Remotely set, adjust or calculate desired slope
- Automatic Target acquisition on TP-L6AV and TP-L6GV models only
- Move the laser’s beam left, right, or center
- Check grade status
- Activate optional plumb beam
- Set or calculate grade
- Change laser mode to steady, flashing, or low-power
- Check battery status
- Remote view of electronic bubble level

This new functionality increases the speed of setting up the laser and reduces time workers spend in manholes, low-light situations and cramped spaces.
